Introduction to Bank Management System in Java

A bank management system is a software application designed to handle all banking operations efficiently. It automates tasks like account creation, deposit, withdrawal, fund transfer, account deletion, and report generation. Implemented using Java, this system leverages object-oriented principles to ensure modularity, scalability, and maintainability.

The primary goal of the project is to simulate real-world banking operations, providing users with an intuitive interface and secure transaction handling. This project also serves as a valuable educational tool for understanding Java programming, data structures, and database integration.

Objectives of the Project

- Develop a user-friendly interface for banking operations.
- Implement secure login and authentication mechanisms.
- Manage customer data efficiently using Java data structures.
- Enable basic banking functionalities such as account creation, deposit, withdrawal, transfer, and balance inquiry.
- Provide report generation features for account summaries and transaction histories.
- Ensure data persistence through file handling or database connectivity.

Scope of the System

The project aims to simulate a simplified version of a banking system with functionalities for both bank administrators and customers. It covers:

- Account management (creation, deletion, update)

- Use password hashing if applicable.
- Validate user inputs to prevent injection or invalid data.

5. Error Handling

- Use try-catch blocks to manage exceptions.
- Provide meaningful error messages.

Sample Class Structure

- ``Account``: holds account details and balance.
- ``Transaction``: records transaction details like date, amount, type.
- ``Bank``: manages accounts and transactions, acts as the main controller.
- ``Main``: contains the main method and menu-driven interface.

Sample Workflow of the System

- User launches the application.
- Presented with login options.
- Upon successful login, user can select options like create account, deposit, withdraw, transfer, or view report.
